<b>FUNDAMENTALS</b>	<b>INVENTORY</b>	<b>COMPLIANCE &amp; BATCH FILLING</b>	<b>REPORTING</b>
7.5 hours	2 hours	2 hours	1 hour
This hands-on training covers the essentials of using PharmaClik Rx. Real-life exercises and scenarios provide the experience to ensure a successful transfer of knowledge.	PharmaClik Rx maintains pharmacy inventory levels within the store with minimal user intervention. This two-hour training session focuses on setting up and managing perpetual inventory. You'll learn to add inventory, order and receive, manually adjust inventory and how to use reports to manage inventory.	This hands-on training covers the different types of compliance packaging and how to configure PharmaClik Rx to use them. You'll fill prescriptions and run reports to help manage these prescriptions. Learn the essentials of processing a group (batch) of prescriptions and how to create groups, set preferences, and schedule groups of prescriptions.	This course builds on what you already know about PharmaClik Rx. You will learn how to read and run reports that will help maximize opportunities to enhance key performance indicators and profitability in your pharmacy.
